

THE VENOM SPIKE PROTEIN THAS HAS CAUSE THE COVID AND VACCINE RELATED INJURIES AND FATALITIES HAS BEEN SCIENTIFICALLY GENETICALLY TRACED TO SNAKES AND IS A BIO-WEAPON DESIGNED TO GENOCIDE THE MASSES.

The venom snake spike protein is synthetically manufactured and inserted into a plasmid, a small circular piece of DNA. They make a ring of DNA and they can insert any payload they want into that plasmid. And this plasmid is little and it gets absorbed into bacteria, into yeast, into your mammal cells. The instruction of a plasmid is to tell whatever cell it gets into to manufacture whatever the Spike protein gene is. They are putting these plasmids into the vaccines and injecting them inside of you.

The way they actually created the COVID-19 pandemic was to spray these plasmids through the air, in your water and in your food. They are manufacturing tons of these plasmids around the world to create pandemics. So I actually came out with a documentary called Watch the Water. We only pay the government to deliver one thing into all of our houses in every industrialized nation around the world. Water. Snake venom is water soluble. Venom of snakes be absorbed through your skin like in a shower and in a bathtub. They are conducting studies all over the world for decades. They know they can get you to drink it. They know they can inject it. They know it'll get absorbed right through your skin, through water. They publish it that they've been doing this.

Forever has been there's a flu season. You've all been exposed to the flu. In order to protect you from this new variant of the flu, we need to give you this vaccine. We're going to put a little bit of the flu in you. So that your immunity can create some reaction to that flu virus that we gave you in the shot. So that when you're exposed to the flu in the future, you already have immunity ready. They just told you they didn't put SARS CoV two in these virus in these vaccines. They only put DNA plasmids inside of them to protect you from COVID . There is a mass genocide going on. The government in the United States is now putting these plasmids through everybody's water system.

The whole world was getting sick basically simultaneously. This was something globally beyond just the United States government. How did they orchestrate something like that? Through the water systems. This is actually an agenda that started out in the Nazi Holocaust concentration camps. They had two things they discovered in Nazi Germany that they could actually control their people inside of those actual camps. They knew they had to control their water systems and they had to control the vaccines injections into them. They were experimenting with metals to see if they could control and subdue their actual resistance and then they could poison them and subdue them through their water systems. We brought all over the Nazi war crime people put them into the CIA and NASA. Just a few years later the water treatment systems of America were built. This is when the vaccine agenda in America took off.

They are using the water delivery systems to create pandemics. And there was a warning written in 2007. There's a paper written titled Water and Terrorism and it goes through all major industrialized nations in the whole world where the weaknesses are inside their treatment systems for water that would allow any terrorist organization, group, country, you name it to put anything they wanted into the water, deliver it to any communities or villages, create a pandemic, weaken those individuals and be able to take them over with war or by military force. So it's basically weaponizing our water system. They list in 2007, they actually put in the document what can be put in your water systems to create these pandemics, done and performed and orchestrated by what he calls terrorists. And he lists things like this weaponized E. Coli bacteria, weaponized yeast. You can put in the water and suspend it. You can put defense toxins from animals in the water and make people sick.

Defense toxins from animals are venoms. They go so far as to tell you how to manipulate and allow those toxins. Poisons, anthrax included diphtheria, toxin included, ricin. In the document, it tells you how to make those deadly toxins, poisons, and pathogens, how to get them to die with a certain amount of chlorine, and how to reduce the chlorine to let it live. You could create an outbreak in your town or in your city in New York City. You could create an epicenter outbreak in New York, take just a few skyscrapers and put venom in that water, send it up those actual apartments, and you can make thousands of people sick overnight by taking showers, bathing in it, drinking the water they're going to drink, the venom. They're going to break out with what's called respiratory failure or arrest. They're going to end up in your New York hospitals. They're going to pump you full of remdesivir, throw a whole bunch of dead people who died from acute kidney failure from a drug, and set the stage for a global pandemic using America's media conglomerates.
